# About Company

Rose Testing is a young and energetic Geotechnical and Material Testing company that is always ready to provide quality testing results.

RT is also sufficient in providing Geotechnical Engineering Investigation and all types of Construction Face Support (Geotechnical Inspections).

Our integrated service delivers quality results within the time limit. Our team consists of experienced technical skilled professionals who are always ready to provide their services.

# Milestones

2020

- Company Establishment
- Engineering Services

2021

- NATA Accredited
- Paramatta Light Rail Project
- M6 Motorway, Stage 1 Project
- Meriton Apartments, Zetland Project
- Sydney Water Accreditation

2022

- Memorial avenue Upgrade Project
- Western Sydney Airport Metro, SBT Project
- John Hunter Health & Innovation Project, Newcastle

2023 - 24

- City of Sydney, Road and Pavement Remediation Project
- Mac Arthur Memorial, Varroville
- Westlink, ESR Kemps Creek Project
- 41, Town Trace Glenmore Park (Service NSW) Project
- Mascot, Sydney Domestic Airport, T2
- Mascot, Sydney International Airport

2023 - 24

- Bankstown Airport
- Western Sydney Airport
- Elizabeth Drive, M7-M12 Intersection Project
- TFNSW Accreditation
- New Laboratory Establishment

**Vision**

**Vision**

To become the first soil testing solution maker in NSW by conducting our customers to achieve optimum project results, and to satisfy careers for our people, and to earn a fair return on the values we deliver.

# Mission

- To motivate and educate our Employees.
- To meet and exceed our client's expectations.
- To deliver our projects in time with high quality.
- To set up the best budget-time framework.
- To guide the clients into the best approach.

# Our Services

## Material Laboratory Testing

- Compaction Control Testing (TfNSW, AS)
- Moisture Content (TfNSW, AS)
- Field Density Nuclear
- California Bearing Ratio (CBR)
- Atterberg Limits (PI)
- UCS of road materials
- Benkelman Beam
- Concrete Testing
- Asphalt Testing
- Sydney Water Service Provider

## Geotechnical Investigations

- Proof Roll, Subgrade, and Stripping Inspections
- Dynamic Cone Penetrometer (DCP)
- Foundation Inspections
- Trench Stability Assessment
- Crane Pad, Piling Pad Assessment,
- Piling Excavation Inspections
- Lot Classifications
- Soil Classifications
- Pavement Investigations
- Slope Stability Assessment (Temporary, Permanent)

## Geotechnical Site Inspections

- Level One And Two Earthworks Inspection
- Nuclear Gauge Compaction Testing
- Trench Stability
- Bearing Capacity Assessments
- Ground Inspections
- Pile / Pad Assessment
- Plate Load Testing
- Point Load Testing
- Proof Rolling Reports

## Construction Design

- Engineering Assessment Certification and Reports
- Shoring Box Design & Assessment
- Platform Design & Certification Reports
- Slope Stability Analysis and Reports
- Pavement Design

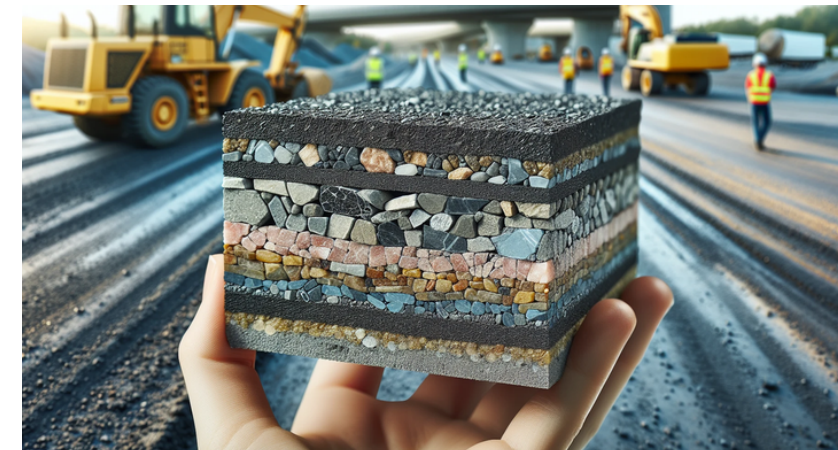

## Environmental & Analytical Testing

- Asbestos
- Contaminated Soil Analysis
- Waste Management
- Soil Classification
- Waste Water
- Underground water monitoring and testing
- VENM / ENM Reports
- Salinity Investigations

## Asphalt and Concrete Testing

- Concrete Compressive Strength
- Concrete Core Testing
- Asphalt Density Testing
- Asphalt Air Voids Testing
- Asphalt Core Testing
